LOYAL HIT / ACCOUNT MANAGEMENT

Account edit.
CSRF assessment

NO CSRF BYPASS OBSERVED

Manual token-mutation checks did not produce a saved display-name change. This record documents the reported results; no vulnerability is confirmed.

ASSESSOR
Haroon Shahid

TARGET
loyalhit.com

RECORD TYPE
Control assessment

01 / REQUEST IN SCOPE

`POST /my-account/edit-account/`

```
Probe: account_display_name=csrf1
Token: save-account-details-nonce
```

02 / REPORTED TEST RESULTS

TEST	REQUEST CHANGE	OBSERVATION
Incorrect token	One character changed in the valid token	No name change
Missing token	Token parameter removed	No name change
Empty token	Token value left empty	No name change
Token substitution	Alternate token used; source not recorded	No name change

03 / INTERPRETATION & EVIDENCE LIMITS

The results are consistent with nonce validation. A successful unmodified valid-token replay and the substituted token's source and validity were not documented. Response captures, cross-site browser proof and sensitive-action impact are not included.

Disposition: retain as an assessment record. No severity rating is assigned. These checks do not establish the security of other account actions or the site as a whole.

EVIDENCE A / SUPPLIED PROXY CAPTURE

Original request

```
POST /my-account/edit-account/ HTTP/2
